Kipawa Lake 2017 Water Quality Sampling Results

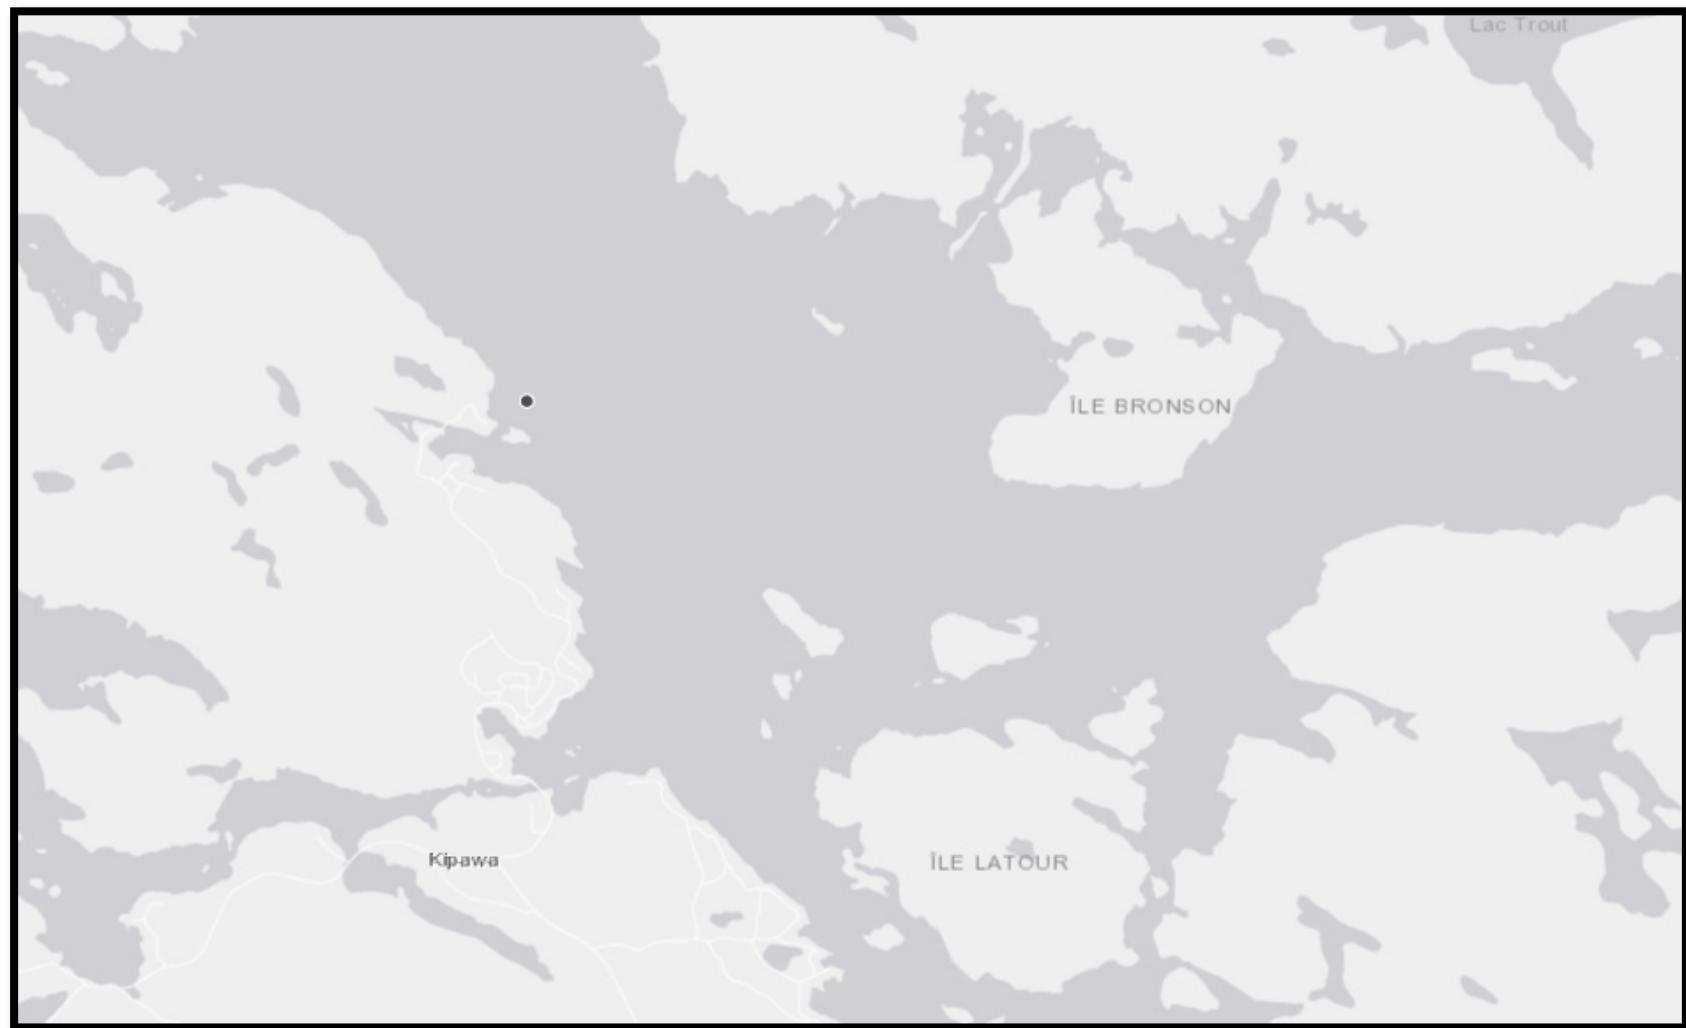

Figure 1. Map of Baie des Anglais (Kipawa Lake), 2017 sampling site location ($46^{\circ}48'18.00''$ N, $78^{\circ}59'00.70''$ W) indicated by black circle.

Table 1. Concentration of metals and pH of surface water collected on August 16th 2015 at 1:30 pm along the upper Kipawa River near Lake Sheffield ($46^{\circ}48'27.78''$ N, $78^{\circ}31'00.18''$ W), October 4th 2015 at approximately 11 am at Red Pine Chutes ($46^{\circ}50'23.45''$ N, $78^{\circ}36'45.70''$ W) and November 16th 2017 at approximately 10 am at Kipawa (Baie des Anglais; $46^{\circ}48'18.00''$ N, $78^{\circ}59'00.70''$ W). Water samples were 'grab' samples collected at the surface. Water samples were transported to Testmark Laboratories in Garson ON within 48 hours of collection for analysis. MDL (Minimum Detection Limit) indicates the minimal level detected by the test method used. Health Canada (2014) MAC (Maximum Allowable Concentration) for drinking water, Ontario PWQOs (Provincial Water Quality Objectives; Ontario Ministry of Environment and Energy 1994) and Quebec Standards for the protection of aquatic life (Gouvernement du Québec 2015) are provided as a standard of comparison. Quebec guidelines include levels that result in chronic and acute toxicity as well as the level permitted for release via effluent. Parameters outside of the established guidelines are indicated in bold text.

Parameter	Units	MDL	Health Canada drinking water MAC	Ontario PWQOs	Protection of aquatic life Quebec			Lake Sheffield	Red Pine Chutes			Kipawa (Baie Des Anglais)
					Chronic toxicity	Acute toxicity	Permitted in effluent		1	2	3	
Iron (II)	mg/L	0.2	-	-	-	-	-	<0.2	0.22	<0.	<0.2	0.32
Iron (III)	mg/L	0.2	-	-	-	-	-	<0.2	<0.2	0.2	0.25	<0.2

pH	pH	-	6.5-8.5	6.5-8.5	6.5 - 9	6.5 - 9	6 - 9	6.46	6.45	6.2	6.18	-

Note: Allowable concentration of metals (Silver, Barium, Beryllium, Cadmium, Chromium III, Copper, Manganese, Nickel, Lead, and Zinc) from Quebec standards based upon hardness of 10 mg CaCO₃/L and may vary if hardness differs from this value.

'-' indicates no data available or no established guideline

Table 2. Bacteria, chlorophyll and phosphorus levels measured in surface water collected on August 16th 2015 at 1:30 pm along the upper Kipawa River near Lake Sheffield (46°48'27.78" N, 78°31'0.18" W) and on November 16th 2017 near Kipawa (Baie Des Anglais; 46°48'18.00" N, 78°59'00.70" W). Water samples were 'grab' samples collected at the surface. Water samples were transported to Testmark Laboratories in Garson ON within 48 hours of collection for analysis. MDL (Minimum Detection Limit) indicates the minimal level detected by the test method used. Health Canada (2014) MAC (Maximum Allowable Concentration) for drinking water, Ontario PWQOs (Provincial Water Quality Objectives; Ontario Ministry of Environment and Energy 1994) and Quebec Standards for the protection of aquatic life (Gouvernement du Québec 2015) are provided as a standard of comparison. Quebec guidelines include levels that result in chronic and acute toxicity as well as the level permitted for release via effluent. Parameters outside of the established guidelines are indicated in bold text.

Parameter	Units	MDL	Health Canada drinking water MAC	Ontario PWQO	Protection of aquatic life Quebec		Lake Sheffield August 16 th 2015	Kipawa (Baie des Anglais) Nov. 16th 2017
					Indirect contact (canoeing, fishing)	Direct contact (swimming)		
Dissolved Total	mg/L	0.00	-	-	-	-	<0.004	0.0038*
<i>E. coli</i>	CFU/	1	0	<100	-	-	2	0
Total coliforms	CFU/	1	-	-	<1000	<200	-	6.5
Chlorophyll a	µg/L	0.5	-	-	-	-	-	<0.5

" " Indicates no data available or no established guideline

* phosphorus measured on July 24th 2017 as part of the Government of Ontario Lake Partner Program, a Secchi disc reading of 6 meters was also taken on this date and at this location.
